KIDSIGHT
SOUTH DAKOTA

What is KIDSIGHT?

KidSight South Dakota is a free statewide vision screening program provided to children ages 12 months and up. Our trained volunteers use the latest technology and equipment to detect many eye conditions. The vision screening machine simply takes a picture of the child's eyes and within seconds provides accurate results. No physical contact is made with the child and no eye drops are required.

Why Vision Screening?

According to educational experts, 80% of learning is visual. So if a child can't see well, they can't learn well. Yet most young children don't get their vision screened until they have problems learning or paying attention in school. By then, it may already be too late. Unless vision problems are detected early and corrected, they risk becoming permanent by age 7.

Contact us today to set up a free vision screening at your daycare, school or community event!

With one simple picture of a child's eyes, we can detect:

Myopia: Near Sighted

Hyperopia: Far Sighted

Astigmatism: Blurred Vision

Anisocoria: Pupil Size Deviations

Strabismus: Lazy Eye

Anisometropia: Unequal Refractive Power
